Professional Summary

I worked on a MERN (MongoDB, Express, React, Node.js) stack to develop a web application's backend functionality. I also worked on c# asp.net framework web form with SQL Server Database. I am also familiar with HTML, CSS, JS, Java and C++.

Education

Bachelors of Software Engineering, Bahria University Karachi Campus (In Process)

Skills

- MERN Stack (Mongo DB, Express JS, Node JS)
- Asp.net (.net Framework) Web Forms
- SQL Server
- Java, C# and C++ Programming
- HTML & CSS
- JavaScript

Personal Projects:

- **Al-Hadi:** Developed a MERN-based web application for Al-Hadi backend using Node.js, Express.js, and MongoDB
- **JHA Insurance:** Developed and implemented SQL Server database for JHA Insurance including designing and implementing database tables, stored procedures, and triggers for seamless integration with the front-end based on Asp. Net Web forms.
- **C++ Console Based Bus Booking System:** Developed a console-based bus booking system using C++, which implemented the reader-writer problem to handle concurrent access to shared resources. The application allowed users to search for available buses, book seats, and view their bookings. Utilized file handling and multi-threading to enhance the efficiency and functionality of the system.
